

T-zer AA-RI Light kit

Wiring hook-up directions

Gen 3 Talon accessory hook-up option

Note:
 You can attach and control your Rigid lights through the Talon's accessory circuit
BUT
 Minn Kota has not approved this.

If you decide to use this method you will be able to turn your lights on/off w your remote mode function by holding it down for 4 seconds or with the accessories toggle on compatible Humminbird units

Note: to be compliant with USCG rules your White All Around Anchor light should be controlled from your boat's dash board

Tie the Rigid light wire(s) into the black and red loose wires behind the Talon's control panel
