

# T-zer AA-RI Light(s) Wiring hook-up directions

## Gen 3 Talon accessory hook-up option

Note:  
You can attach and control your Rigid lights through the Talon's accessory circuit  
**BUT**  
Minn Kota has not approved this.

If you decide to use this method you will be able to turn your lights on/off w your remote mode function by holding it down for 4 seconds or with the accessories toggle on compatible Humminbird units

Tie the Rigid light wire(s) into the black and red loose wires behind the Talon's control panel
